

Solar Expo Chile 2020

Solar Energy Fair
Communications department

03rd July, 2020

Reference: Postponement of activities.

Solar Expo Chile 2020 reports that due to the current global pandemic and new outbreaks of contagion in countries that thought the disease was under control, the organizing committee has decided to postpone the event scheduled for October 13-14, 2020 in Casa Piedra, Santiago Chile.

The above in consideration of the recommendations of the World Health Organization (OMS) and the consequences of the expansion of COVID-19 in our country. Beyond having security measures in reference to social distancing in our face-to-face event, the duty to protect the health of our attendees, their physical integrity and that of their families prevails.

Faced with the current scenario, Solar Expo Chile 2020 thanks the sponsors, speakers, exhibitors and future attendees for their support when they find out about the situation we are facing and we cordially invite them to continue to contact us. We will let you know about our new date for 2021 soon, in the hope that we have decreased the global risk that affects us.

INNOVATION AND ENERGY DEVELOPMENT SOUTH OF THE WORLD.
